Cover letter - <https://data-migration.club/CV/CL-jaspersoft-engineer-UA.pdf>

Please note my total experience of 10 years in development, implementation and technical support in the financial, insurance and banking fields. During this time I gained expertise in database design, development and optimization.

I worked for JasperSoft technical support and learned how to create TIBCO Jaspersoft reports based on user requirements. My responsibilities included troubleshooting reporting issues and responding to user requests in a timely manner. I had to cooperate with teams from Ukraine, the USA to support the decisions made. During the work, we followed the established standards regarding the organization of technical support.

I also worked as a database developer on other projects, engaged in ETL data migration processes. Our team was engaged in creating data flows from industrial OLTP systems to warehouses (DWH).

While working at the "Kyivstar" company, I developed reports in the SAP Business Objects system.

Studying physics and mathematics helped me develop strong analytical skills and an ability to notice details.

## Technical skills and technologies

Development for Oracle databases, Microsoft SQL server - 10 years

Reports and dashboards – 5 years      MS Azure – 2 years

SQL queries - 10 years                      Java – 2 years

Linux Systems (Red hat & Ubuntu) - 6 yrs.

## Languages

English – B2 level      English Benchmark YMCA test <https://bit.ly/44Jlt56>

German – A2 level,      Ukrainian – native speaker

**Senior developer (remote)** Oct 2021 – Aug 2022 Codegenix (USA) для GlueUp

**Skills:** Data Migration · Database Development · SQL Tuning · Mongo database · Business Intelligence (BI) · Python · Talend · Java · SQL · ETL
